CARDIAC ARRHYTHMIAS AND SUDDEN DEATH: FROM BASIC MECHANISMS TO STATE-OF-THE-ART MANAGEMENT

257
PREVALENCE OF PAROXYSMAL SUPRAVENTRICULAR TACHYCARDIA (PSVT) IN THE UNITED STATES IN PATIENTS UNDER 65 YEARS OF AGE
N.C. Sacks1, P.L. Cyr1, S. Bariahtaris2, A. Sharma3, S.G. Green4, P. Douville5, J.N. Ruskin6

5Milestone Pharmaceuticals Inc., Montreal, QC, Canada
6Massachusetts General Hospital, Boston, MA, USA

Objective: Paroxysmal Supraventricular Tachycardia (PSVT) prevalence estimates based on chart audits of a single encounter, with ECG confirmation, may underestimate prevalence, given the episodic nature of PSVT. The objective of this study is to estimate PSVT prevalence in the U.S. using longitudinal data from a large employer-based claims data set.
Methods: Data Source: Truven Health Analytics MarketScan databases, with demographic, enrollment, medical and prescription drug claim data for 89,800,000 commercially insured individuals over 4 years. Study population: Patients < age 65 with a PSVT diagnosis (ICD-9: 427.0; ICD-10: I47.1) from October 2012 to September 2016. Prevalence: Age- and sex-adjusted ratios of PSVT patients to total number of individuals with insurance coverage in each year were used to calculate prevalence in the U.S. population. Patients with a PSVT diagnosis were counted in each year they were observable. Estimates were projected to the U.S. population by age and gender using U.S. census data.
Results: A total of 186,026 PSVT patients < age 65 were identified in the claims data. When projected to the U.S. population, annual prevalence estimates ranged from 1,107,101 to 1,396,182. The majority of PSVT patients (61%) were female; most (62%) were age 41 to 64 (Table 1).
Conclusion: Based on coded clinical diagnoses, PSVT affects 1.1 to 1.4 million individuals < age 65 in the U.S. annually. Estimates that rely on a single medical encounter may underestimate PSVT prevalence.

Table 1. PSVT Prevalence Projected to the United States

Table with 5 columns: Age Group (M, F, %), 2015-2016, 2014-2015, 2013-2014, 2012-2011. Rows include Total PSVT Patients, Age Group (M, F, %), 18-49 Years Old, 50-64 Years Old, 65-79 Years Old.

AHA Scientific Statement

Essential Features of a Surveillance System to Support the Prevention and Management of Heart Disease and Stroke
A Scientific Statement From the American Heart Association Councils on Epidemiology and Prevention, Stroke, and Cardiovascular Nursing and the Interdisciplinary Working Groups on Quality of Care and Outcomes Research and Atherosclerotic Peripheral Vascular Disease

Executive Summary
A strategic goal of the American Heart Association (AHA) is to reduce heart disease, stroke, and risk for both by 25%...
Outstanding Recommendation
1. A National Heart Disease and Stroke Surveillance and Health System should be established to provide essential system-wide indicators of progress in the prevention and management of heart disease and stroke...
2. Cardiovascular disease (CVD), including cardiac arrhythmias, and coronary artery disease (CAD), are the most common cardiovascular conditions that cause death and disability...
3. Data collection about patients' encounters with the health care system should be revised to include additional data on (applicable) chronic conditions...
4. Data collection should be standardized across surveys, and unnecessary duplication in data sources should be avoided...
5. Primary and secondary prevention of CVD.

The American Heart Association makes every effort to avoid any actual or potential conflicts of interest that may arise as a result of relationships...

### Abstract

In healthcare industry, data mining plays a vital role for predicting diseases. These large amounts of data are very important in the field of Data Mining to mine useful information and generate relationships with the attributes. Heart disease prediction system can help health professionals in predicting heart disease status based on the medical data of the patient. Data mining offers the methodology and technology to change these loads of data into helpful information for decision making. This paper intends to give a survey of current techniques of knowledge discovery in databases via data mining techniques in heart disease prediction.

**Keywords:** Data Mining, Heart Disease, Risk Factors, Prediction, Accuracy.

### INTRODUCTION

Data mining is used successfully and extensively in healthcare today. Data mining is the analysis of large data sets to discover patterns and use those patterns to forecast or predict the likelihood of future events. Usually, the mined information is represented as a model of the semantic structure of the dataset. It may be probable to employ the model in the prediction and classification of new data [3]. Healthcare

## A quadratic penalty algorithm for linear programming and its application to linearizations of quadratic assignment problems

### Abstract

This paper provides the first meaningful documentation and analysis of an established technique which aims to obtain an approximate solution to linear programming problems prior to applying the primal simplex method. The underlying algorithm is a penalty method with naive approximate minimization in each iteration. During initial iterations an approach similar to augmented Lagrangian is used. Later the technique corresponds closely to a classical quadratic penalty method. There is also a discussion of the extent to which it can be used to obtain fast approximate solutions of LP problems, in particular when applied to linearizations of quadratic assignment problems.

### 1 Introduction

The efficient solution of linear programming (LP) problems is crucial for a wide range of practical applications, both as problems modelled explicitly, and as subproblems when solving discrete and nonlinear optimization problems. Finding an approximate solution particularly rapidly is valuable as a "crash start" to an exact solution method. There are also applications where it is preferable to trade off solution accuracy for a significant increase in speed.

The "Idiot" crash within the open source LP solver C1p [2] aims to find an approximate solution of an LP problem prior to applying the primal revised simplex method. In essence, the crash replaces the minimization of the linear objective subject to linear constraints by the minimization of the objective plus a multiple of a quadratic function of constraint violations.

Heart disease report sample. Heart disease template. Heart disease prediction research paper. Heart disease powerpoint template free download. Heart disease ppt template.

At the end of each legend, abbreviations are identified in alphabetical order. These include all products that support Citation Style Language styles, such as Mendley. • Embed the used fonts if the application provides that option. Titles are often used in information-retrieval systems, (Nomenclature) and Units Measurements of length, height, weight, and volume are reported in metric units (meter, kilogram or liter) or their decimal multiples. Changes to authorship Authors are expected to consider carefully the list and order of authors before submitting their manuscript and provide the definitive list of authors at the time of the original submission. The actual authors can be referred to, but the reference number(s) must always be given. These will be used instead of standard icons and will personalize the link to your video data. Content should make no assumptions about the beliefs or commitments of any reader; contain nothing which might imply that one individual is superior to another on the grounds of age, gender, race, ethnicity, culture, sexual orientation, disability or health condition; and use inclusive language throughout. Appendices If there is more than one appendix, they should be identified as A, B, etc. Concise and informative. Elsevier has preprinted forms for use by authors in these cases. For gold open access articles: Upon acceptance of an article, authors will be asked to complete a "License Agreement" (more information). Types of articles The Journal accepts Clinical research papers (original articles), Reviews, Guidelines, Editorials and Letters to the editor. To a book: [3] Strunk Jr W, White EB. This responsibility includes answering any future queries about Methodology and Materials. For an extra charge, paper offprints can be ordered via the offprint order form which is sent once the article is accepted for publication. Substantive contributions of individuals are noted in the Acknowledgements, positioned before the Statement of Conflict of Interest. For more information on depositing, sharing and using research data and other relevant research materials, visit the research data page. Elsevier supports responsible sharing Find out how you can share your research published in Elsevier journals. Methods that are already published should be summarized, and indicated by a reference. Web-based proofing provides a faster and less error-prone process by allowing you to directly type your corrections, eliminating the potential introduction of errors. If preferred, you can still choose to annotate and upload your edits on the PDF version. No vertical lines are used between columns. The datasets will be listed and directly accessible to readers next to your published article online. For more information, visit the Mendley Data for journals page. The "Learn" environment at Researcher Academy offers several interactive modules, webinars, downloadable guides and resources to guide you through the process of writing for research and going through peer review. Online proof correction To ensure a fast publication process of the article, we kindly ask authors to provide us with their proof corrections within two days. 2. J Sci Commun 2010;163:51-9. Supplementary material Supplementary material such as applications, images and sound clips, can be published with your article to enhance it. Maximum number of references 50 Maximum number of figures 8 The order of the sections is as follows: (1) Title page; (2) Structured abstract, with keywords; (3) List of abbreviations; (4) Body of the text; (5) References; (6) Figure legends; (7) Tables and (8) Figures. An e-mail will be sent to the corresponding author confirming receipt of the manuscript together with a 'Journal Publishing Agreement' form or a link to the online version of this agreement. Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. The electronic text should be prepared in a way very similar to that of conventional manuscripts (see also the Guide to Publishing with Elsevier). A combined Results and Discussion section is often appropriate. Temperatures are given in degrees Celsius. If no template is yet available for this journal, please follow the format of the sample references and citations as shown in this Guide. We advise to seek gender neutrality by using plural nouns ("clinicians, patients/clients") as default/whenever possible to avoid using "he, she," or "he/she." We recommend avoiding the use of descriptors that refer to personal attributes such as age, gender, race, ethnicity, culture, sexual orientation, disability or health condition unless they are relevant and valid. Ensure that the e-mail address is given and that contact details are kept up to date by the corresponding author. • Present/permanent address. Open access Please visit our Open Access page for more information. Contact details All manuscripts should be submitted electronically Submission checklist You can use this list to carry out a final check of your submission before you send it to the journal for review. Reference to a chapter in an edited book: [3] Mettam GR, Adams LB. Permitted third party reuse of gold open access articles is determined by the author's choice of user rights. As an author you (or your employer or institution) have certain rights to reuse your work. Graphical abstract. Unpublished results and personal communications are not recommended in the reference list, but may be mentioned in the text. Video Elsevier accepts video material and animation sequences to support and enhance your scientific research. To facilitate this, please include the following separately: Title page (with author details): This should include the title, authors' names, affiliations, acknowledgements and any Declaration of Interest statement, and a complete address for the corresponding author including an e-mail address. Anonymized manuscript (no author details): The main body of the paper (including the references, figures, tables and any acknowledgements) should not include any identifying information, such as the authors' names or affiliations. Sure. New York: Longman; 2000. To facilitate reproducibility and data reuse, this journal also encourages you to share your software, code, models, algorithms, protocols, methods and other useful materials related to the project. Below are a number of ways in which you can associate data with your article or make a statement about the availability of your data when submitting your manuscript. This illustration must be accompanied by a full legend clearly marked Central illustration. The Graphical Abstract should be listed and numbered sequentially in your list of figure legends. If you wish to make changes to supplementary material during any stage of the process, please make sure to provide an updated file. Authors are asked to provide a central illustration (line or pictorial) that summarizes an important message of the review. Such manuscripts must adhere to the aforementioned length guidelines (5000 words maximum) and require an unstructured abstract (250 words). Review in translational cardiovascular medicine Review a contemporary topic of translational science. TIFF (or JPEG): Color or grayscale photographs (half-tones), keep the permission from the copyright holder for both print and electronic formats is submitted with the material. If you use reference management software, please ensure that you remove all field codes before submitting the electronic manuscript. If no grid is used, use tabs, not spaces, to align columns. Any references cited in the abstract must be given in full. Mortality data for Japanese oak wilt disease and surrounding forest compositions, Mendley Data, v1: 2015, 2018;19:e020205. Web references As a minimum, the full URL should be given and the date when the reference was last accessed. Figure captions Ensure that each illustration has a caption. Papers deemed suitable are then typically sent to a minimum of two independent expert reviewers to assess the scientific quality of the paper. Research letters should not include any abstract or subheadings. It is an official journal of the Société française de cardiologie and is published monthly. Prefactoring is solely your responsibility. Statistical measures of variations, such as standard deviation and standard error of the mean, are identified. New York: E-Publishing Inc; 2009. p. Conclusions The main conclusions of the study may be presented in a short Conclusions section, which may stand alone or form a subsection of a Discussion or Results and Discussion section. Introduction to the electronic age. Video and animation files supplied will be published online in the electronic version of your article in Elsevier Web products, including ScienceDirect. Heliyon. Figures, symbols, letters, etc. Keywords Six keywords are appended to the abstract. Data references This journal encourages you to cite underlying or relevant datasets in your manuscript by citing them in your text and including a data reference in your Reference List. Original articles Manuscript form: The manuscript does not exceed 5000 words, counting the title page and all other pages except tables. It is important to ensure that all corrections are sent back to us in one communication. In order to ensure that your video or animation material is directly usable, please provide the file in one of our recommended file formats with a preferred maximum size of 150 MB per file, 1 GB in total. Feel free to use these free resources to improve your submission and navigate the publication process with ease. Both corresponding and co-authors may order offprints at any time via Elsevier's Author Services. Please state this: 'Declarations of interest: none' Discussion This should explore the significance of the results of the work, not repeat them. Offprints The corresponding author will, at no cost, receive a customized Share Link providing 50 days free access to the final published version of the article on ScienceDirect. Figure legends are provided on a separate sheet. Reference to a book: [2] Strunk Jr W, White EB. Any such submission is subject to all of the journal's usual procedures, with peer review handled independently of the relevant editor and their research groups. Data references should include the following elements: author name(s), dataset title, data repository, version (where available), year, and global persistent identifier. Abbreviations Six standard abbreviations should be used. The title appears at the top and abbreviations appear in alphabetical order at the bottom. We suggest using alternatives that are more appropriate and (self-) explanatory such as "primary", "secondary", "blocklist" and "allowlist". Online supplemental materials for methods and results are permitted. These focused letters should not exceed 1000 words and 8 references, with 1 figure or table. Corresponding authors who have published their article gold open access do not receive a Share Link as their final published version of the article is available open access on ScienceDirect and can be shared through the article DOI link. Significant changes to the article as accepted for publication will only be considered at this stage with permission from the Editor. While the Editor considers the request, publication of the manuscript will be suspended. Any further information, if known (DOI, author names, dates, reference to a source publication, etc.), should also be given. Otherwise, please indicate the position of footnotes in the text and list the footnotes themselves separately at the end of the article. Please use this proof only for checking the typesetting, editing, completeness and correctness of the text, tables and figures. Declaration of interest All authors must disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. This may be a requirement of your funding body or institution. Do not annotate any corrections on a previous version. Indicate all affiliations with a lower-case superscript letter immediately after the author's name and in front of the appropriate address, e.g., 51-9, and that for more than 6 authors the first 6 should be listed followed by 'et al.'. For further details you are referred to 'Uniform Requirements for Manuscripts submitted to Biomedical Journals' (J Am Med Assoc. 1997;277:927-34) (see also Samples of Formatted References). Editable files (e.g., Word, LaTeX) are required to typeset your article for final publication. This can be done in the same way as a figure or table by referring to the video or animation content and noting in the body text where it should be placed. Using citation plug-ins from these products, authors only need to select the appropriate journal template when preparing their article, after which citations and bibliographies will be automatically formatted in the journal's style. Please indicate your preference for color: in print or online only. • Submit each illustration as a separate file. • Ensure that color images are accessible to all, including those with impaired color vision. A detailed guide on electronic artwork is available. You are urged to visit this site; some excerpts from the detailed information are given here. Formats If your electronic artwork is created in a Microsoft Office application (Word, PowerPoint, Excel) then please supply 'as is' in the native document format. Figures include no information that would allow a patient or hospital to be identified. Authors may be invited by the editorial committee or send by e-mail their unsolicited proposal to be reviewed before submitting their paper. Corresponding authors will receive an e-mail with a link to our online proofing system, allowing annotation and correction of proofs online. Data statement To foster transparency, we encourage you to state the availability of your data in your submission. Please refer to the "References" section for more information about data citation. The element s of style. All non-standard abbreviations that are used in each table are explained in footnotes. Please clearly indicate the given name(s) and family name(s) of each author and check that all names are accurately spelled. In: Jones BS, Smith RZ, editors. Figures that require excellent resolution (echocardiographic or angiographic images, MRI, CT scan, sctigraphy, all non-standard, microscopic or macroscopic specimen, etc.) are saved in TIFF format at a resolution of at least 300 pixels per inch at the final printed size for color figures and photographs, and 1200 pixels per inch for black and white line drawings. Abstract Maximum 250 words. • Number the illustrations according to their sequence in the text. All submitted files should be properly labeled so that they directly relate to the video file's content. Archives of Cardiovascular Diseases is an international, English-language, peer-reviewed journal concerned with cardiovascular

medicine. Sections are appropriately subdivided and subtitled. Details are indicated by arrows. All hematological and clinical chemistry measurements are reported in the metric system to the International System of Units (SI). Formulae and equations in appendices should be given separate numbering: Eq. (A.1), Eq. (A.2), etc.; in a subsequent appendix, Eq. (B.1) and so on. Regardless of the application used other than Microsoft Office, when your electronic artwork is finalized, please 'save as' or convert the images to one of the following formats (note the resolution requirements for line drawings, halftones, and line/halftone combinations given below): EPS (or PDF); Vector drawings, embed all used fonts. If an author has moved since the work described in the article was done, or was visiting at the time, a 'Present address' (or 'Permanent address') may be indicated as a footnote to that author's name. Clearly indicate who will handle correspondence at all stages of refereeing and publication, also post-publication. A list of the abbreviations is provided on a separate page. No original data may be included. If, together with your accepted article, you submit usable color figures then Elsevier will ensure, at no additional charge, that these figures will appear in color online (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in color in the printed version. The [dataset] identifier will not appear in your published article. Editors do not invite reviewers who have potential competing interests with the authors. Submitted supplementary items are published exactly as they are received (Excel or PowerPoint files will appear as such online). All papers considered suitable by the editors to progress further in the review process will undergo appropriate peer review, and papers provisionally accepted for publication will undergo a detailed statistical review if necessary. You can view Example Graphical Abstracts on our information site.Authors can make use of Elsevier's Illustration Services to ensure the best presentation of their images and in accordance with all technical requirements. It is important for potential interests to be declared in both places and that the information matches. Please use 'Highlights' in the file name and include 3 to 5 bullet points (maximum 85 characters, including spaces, per bullet point). Include the cited article as a reference.Research lettersShort, original research letters will also be considered for publication in a special section of Archives of Cardiovascular Diseases. Further information on the preparation of electronic artwork. The abstract is self-explanatory and does not contain references or abbreviations other than units of measurement. For color reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article. Superscript Arabic numerals are used for such footnotes. Research letters will be peer reviewed in a manner identical to original research articles. Blood pressures are given in millimeters of mercury. Note that source files of figures, tables and text graphics will be required whether or not you embed your figures in the text. Avoid abbreviations and formulae where possible. • Author names and affiliations. Archives of Cardiovascular Diseases also publishes abstracts of papers presented at the annual sessions of the Journées Européennes de la Société Française de Cardiologie and the guidelines edited by the French Society of Cardiology. All instructions for proofing will be given in the e-mail we send to authors, including alternative methods to the online version and PDF.We will do everything possible to get your article published quickly and accurately. Many word processors can build footnotes into the text, and this feature may be used. For more detailed instructions please visit our video instruction pages. If the manuscript has already been published in an online issue, any requests approved by the Editor will result in a corrigendum. Number them consecutively throughout the article. Avoid extensive citations and discussion of published literature. The elements of style. Graphical abstracts should be submitted as a separate file in the online submission system. The system converts your article files to a single PDF file used in the peer-review process. Ensure that the following items are present:One author has been designated as the corresponding author with contact details:• E-mail address• Full postal address All necessary files have been uploaded:Manuscript:• Include keywords• All figures (include relevant captions)• All tables (including titles, description, footnotes)• Ensure all figure and table citations in the text match the files provided• Indicate clearly if color should be used for any figures in printGraphical Abstracts / Highlights files (where applicable)Supplemental files (where applicable)Further considerations• Manuscript has been 'spell checked' and 'grammar checked'• All references mentioned in the Reference List are cited in the text, and vice versa• Permission has been obtained for use of copyrighted material from other sources (including the Internet)• A competing interests statement is provided, even if the authors have no competing interests to declare• Journal policies detailed in this guide have been reviewed• Referee suggestions and contact details provided, based on journal requirements For further information, visit our Support Center. More information is available on our website. They consist of a short collection of bullet points that capture the novel results of your research as well as new methods that were used during the study (if any). When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding.If no funding has been provided for the research, it is recommended to include the following sentence:This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors. Letters must be submitted within one month of the print issue date of the article. Data linking If you have made your research data available in a data repository, you can link your article directly to the dataset. The abstract is not structured in review papers. Footnotes Footnotes should be used sparingly. Note: since video and animation cannot be embedded in the print version of the journal, please provide text for both the electronic and the print version for the portions of the article that refer to this content. Use of word processing software It is important that the file be saved in the native format of the word processor used. Research data This journal encourages and enables you to share data that supports your research publication where appropriate, and enables you to interlink the data with your published articles. e.g., 51-9, and that for more than 6 authors the first 6 should be listed followed by 'et al.' For further details you are referred to "Uniform Requirements for Manuscripts submitted to Biomedical Journals" (J Am Med Assoc 1997;277:927-34), see also Citation in text Please ensure that every reference cited in the text is also present in the reference list (and vice versa). Use of inclusive language Inclusive language acknowledges diversity, conveys respect to all people, is sensitive to differences, and promotes equal opportunities. Further, in order to provide a broad and balanced assessment of the work, and ensure scientific rigor, please suggest diverse candidate reviewers who are located in different countries/regions from the author group. 4th ed. Formatting of funding sources List funding sources in this standard way to facilitate compliance to funder's requirements:Funding: This work was supported by the National Institutes of Health [grant numbers xxxx, yyyy]; the Bill & Melinda Gates Foundation, Seattle, WA [grant number zzzz]; and the United States Institutes of Peace [grant number aaa].It is not necessary to include detailed descriptions on the program or type of grants and awards. Here you will find everything from Frequently Asked Questions to ways to get in touch.You can also check the status of your submitted article or find out when your accepted article will be published. More information on how to remove field codes from different reference management software. Authorship in general has been discussed in the following references ( and ( . Submission Our online submission system guides you stepwise through the process of entering your article details and uploading your files. Letters to the Editor Do not exceed 500 words and focus on a specific article that has appeared in Archives of Cardiovascular Diseases. A caption should comprise a brief title (not on the figure itself) and a description of the illustration. A summary declaration of interest statement in the title page file (if double anonymized) or the manuscript file (if single anonymized). To request such a change, the Editor must receive the following from the corresponding author: (a) the reason for the change in author list and (b) written confirmation (e-mail, letter) from all authors that they agree with the addition, removal or rearrangement. Ethics in publishing Please see our information on Ethics in publishing. Patient photographs are taken in a way that ensures anonymity. The Editor's decision is final. . Please check carefully before replying, as inclusion of any subsequent corrections cannot be guaranteed. All manuscripts correctly submitted to the Archives of Cardiovascular Diseases will first be reviewed by the editors. All original articles and reviews should include a Graphical Abstract (this may be a hand-drawn figure, an algorithm, a figure or a table) among the figures accompanying the text, which summarizes and illustrates the manuscript. The statement that all authors have approved the final article should be true and included in the disclosure.Authorship All authors should validate the submission letter and state that they have read and approved the paper. are large enough to be read easily when the figure is reduced. Elsevier collaborates with a number of repositories to link articles on ScienceDirect with relevant repositories, giving readers access to underlying data that gives them a better understanding of the research described.There are different ways to link your datasets to your article. Archives of Cardiovascular Diseases (formerly Archives des maladies du coeur et des vaisseaux) aims to publish the highest quality material, both clinical and scientific, on all aspects of cardiovascular medicine. Topics covered include coronary artery and valve diseases, interventional and pediatric cardiology, cardiovascular surgery, cardiomyopathy and heart failure, arrhythmias and stimulation, cardiovascular imaging, vascular medicine and hypertension, epidemiology and risk factors, and large multicenter studies. It provides a forum for the exchange of information on all aspects of cardiovascular medicine, including educational issues. Do not include footnotes in the Reference list. For more information, visit the database linking page.For supported data repositories a repository banner will automatically appear next to your published article on ScienceDirect.In addition, you can link to relevant data or entities through identifiers within the text of your manuscript, using the following format: Database: xxxx (e.g., TAIR: AT1G01020; CCDC: 734053; PDB: 1XFN). Abbreviations in the title and abstract are avoided. Double anonymized review This journal uses double anonymized review, which means the identities of the authors are concealed from the reviewers, and vice versa. These guidelines are meant as a point of reference to help identify appropriate language but are by no means exhaustive or definitive. When coding terminology is used, we recommend to avoid offensive or exclusionary terms such as "master", "slave", "blacklist" and "whitelist". The content is self-explanatory and information is not repeated in the text or in figures. Keywords are chosen from the list derived from the Medical Subject Headings (MeSH) of the National Library of Medicine (NLM). If excerpts from other copyrighted works are included, the author(s) must obtain written permission from the copyright owners and credit the source(s) in the article. Examples of potential competing interests include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding. Please have a look at the examples here: example Highlights .Highlights should be submitted in a separate editable file in the online submission system. Manuscripts must be submitted with a cover letter stating that: (1) the paper is not under consideration elsewhere; (2) none of the paper's contents have previously been published; (3) all the authors have read and approved the manuscript and (4) giving full disclosure of any potential conflict of interest (see conflict of interest policy). Keep the layout of the text as simple as possible. Note shortened form for last page number. More information on types of peer review. Most formatting codes will be removed and replaced on processing the article. Should not exceed 5,000 words; the number of references should not exceed 50. Research data refers to the results of observations or experimentation that validate research findings. In the case of addition or removal of authors, this includes confirmation from the author being added or removed.Only in exceptional circumstances will the Editor consider the addition, deletion or rearrangement of authors after the manuscript has been accepted. Tables prepared with Excel are not accepted. Article structure Subdivision The body of the article consists of the following sections: (a) Background; (b) Methods; (c) Results; (d) Discussion and (e) Conclusions. Examples: Reference to a journal publication: [1] Van der Geer J, Hanraads JA, Lupton RA. Authors must disclose any interests in two places: 1. More information. Finally, you should not include existing members of the journal's editorial team, of whom the journal are already aware.Note: the editor decides whether or not to invite your suggested reviewers. The statement will appear with your published article on ScienceDirect. • Use a logical naming convention for your artwork files. In particular, do not use the word processor's options to justify text or to hyphenate words. You can add your name between parentheses in your own script behind the English transliteration. All data in the abstract must also appear in the manuscript text or tables. Detailed disclosures as part of a separate Declaration of Interest form, which forms part of the journal's official records. To verify originality, your article may be checked by the originality detection service Crossref Similarity Check. J Sci Commun 2010;163:51-9. It includes articles related to research findings, editorials and reviews. Manuscripts may be written by a single author or an author group. During the submission process, after uploading your manuscript, you will have the opportunity to upload your relevant datasets directly to Mendeley Data. Peer review This journal operates a double anonymized review process. Elsevier Researcher Academy Researcher Academy is a free e-learning platform designed to support early and mid-career researchers throughout their research journey. The text should be in single-column format. The environment is similar to MS Word: in addition to editing text, you can also comment on figures/tables and answer questions from the Copy Editor. However, do use bold face, italics, subscripts, superscripts etc. Cancer statistics reports for the UK, 2003 [accessed 13 March 2003].Reference to a dataset:[dataset] [6] Oguro M, Mahiro S, Saito S, Nakashizuka T. Maximum number of figures/tables/illustrations : 5. Editorial comments Where appropriate, the editors (and reviewers) may suggest an editorial comment to put a paper or a result into perspective (1500 words maximum, 15 references). If your data is unavailable to access or unsuitable to post, you will have the opportunity to indicate why during the submission process, for example by stating that the research data is confidential.
